

BOW VALLEY RESOURCE

Including Arrowwood, Milo, Queenstown, Shouldice and Mossleigh

Volume 4, No. 2

ARROWWOOD, ALTA., AUG. 30, 1934

Subscription \$2.00, U.S.A. \$1.50

Rex Cafe Under New Management

Dong Chong, of Lethbridge, has purchased the Rex Cafe in Arrowwood, and will take possession on Saturday, Sept. 1st. Dong has had many years of experience in the restaurant business. He intends to make some alterations immediately and says he will conduct a clean up-to-date restaurant. We understand that Charlie, the former proprietor, will leave shortly for China.

The Pictures

See Richard Dix in "Ace of Aces" with Elizabeth Allan, Ralph Bellamy, Theodore Newton and Joe Sauer in the Arrowwood Theatre Thursday night, Aug. 30th. Directed by J. Walter Rubens from the story by John Monk Saunders of "Wings" and "Dawn Patrol". Prices: Adults 35c, Children over twelve years 25c, Children 12 and under 15c.

Church of the Brethren Notes

The Pastor will speak Sunday morning more directly to the public school pupils who will be starting to school next week.

Sunday evening there will be special hymn study preceding the usual program of service. Be present promptly at 8 o'clock.

Business meeting Sunday at 2:30 p.m. Every member should be present and have a part in the Annual Election of officers.

Old Lady: You don't chew tobacco, do you, little boy?
Boy: No, ma'am, but I could let you have a cigarette.

Queenstown Items

Mrs. Henderson and son, Lyle, of Three Hills, is visiting Mrs. Lawther.

Rev. V. M. Gilbert, of Gleichen, was a visitor in Queenstown on Monday.

Mr. J. G. Brown is renewing acquaintances in Milo and Queenstown. Mr. Brown served the Milo-Queenstown United Church for three years and is now stationed at North Vermilion.

Mr. J. M. Phillips, while driving to Arrowwood on Saturday, met with an accident. The soft dirt at the side of the road gave way, causing the car to turn over. Mr. Phillips was not hurt and very little damage was done to the car.

Mr. Clifford Asselstine is going to High River on Saturday to write off one of his examinations.

Mr. Jorgensen has just completed painting and decorating the Queenstown school.

Miss Christine John, of Milo, is visiting Mrs. Ferguson.

Threshing is nearly completed and the elevators are busy day and night.

TRAIN SCHEDULE AT GLEICHEN	
No. 1 Westbound	8:25 a.m.
No. 2 Eastbound	8:45 a.m.
No. 3 Westbound	4:31 a.m.
No. 4 Eastbound	7:05 p.m.

Arrowwood

West bound, Tues., Thurs., 1 pm
East bound, Wed., Fri., 1:30 pm

J. E. Brown Speaks In the Gleichen United Church

Mile stones in the development of mankind were never more obviously seen than in the speaker in the United Church last Sunday. The many friends of J. E. Brown, were very pleased to have him in our community and those who attended service last Sunday witnessed one of the most inspiring addresses ever given in Gleichen—be it none, political, economic, etc. For two years Mr. Brown served the Milo-Queenstown church and was invited for another year. Now he is serving North Vermilion Mission which has already extended an invitation for the summer of 1935. As a student Mr. Brown had an outstanding career. A year ago he received his B.A. degree and "this spring his Masters". In theology last year he won \$120 scholarship and only missed by one the I. O. D. E. scholarship in history valued at \$5,500. Already the staff have suggested that he is in line for the travelling scholarship awarded at the end of the work in theology. And this ability showed itself in the plain presentation of a great truth in his Sunday evening sermon.

Choosing as his text the verse connected with the earthquake at Philippi—"and the jailer thought that they had escaped," he stated that "many like the jailer think that Christianity has fled amid the earthquake since 1914." But neither have calculated on the incalculable. Christianity. The power of Christianity made Paul and Silas stand their ground instead of trying to escape, so Christianity in every social earthquake since its beginning has manifested an incalculable element which leavened society, e.g., the catastrophe of 1789 was followed by the Wesleyan revival.

The supreme need today is the re-kindling of the fires of religion. Christianity as we understand it, as Christians retained the Christ. The problem is to keep Christ for ourselves. Christianity will be victorious when Christians are. If our day is to be renewed as the days of the past have been, it will be renewed as we renew ourselves in Christlikeness amid the paradox of sin. It will be as we embark on the glorious adventure of personal loyalty to Jesus Christ.

Brethren Young People Meet at the River

The Young People of the Church of the Brethren assembled at the river Sunday afternoon where election of officers for the coming year took place. The following officers were elected.

Pres.—Donald Bowman.
Vice-Pres.—Evalyn Barries.
Sec. Treas.—Chester Arney.
Hilred Vancil and Russell Barries were put in charge of plans of Young People's activities through the winter months. After a picnic lunch the Young People were joined by the rest of the Bow Valley congregation in a Vesper Service. This service was held on the top of a hill so all present could see the beauties of God's handiwork on all sides. This was emphasized by appropriate Bible scriptures and songs which made one feel God's presence very near. Special music was rendered by Alberta Mason and Grace Brubaker and Russell Barries.

Immediately following vesper service a camp fire meeting was held. A number of Young People gave fitting testimonies of their desire to do any service towards the Lord's work. Grace Brubaker then gave a talk on "How Older Folks can inspire the Young Folks" in which she stated that a word of praise, loving prayers, and words of constructive advice often help greatly in Young Folks to keep their standards high. Mrs. Wisard responded in a speech, "How the Young People Inspire Older Folks to greater services. In her well spoken speech she stated the Young Folks give spirit and vigor to the older ones. As the young folks usually follow the example of older people she challenged the mothers and fathers to live lives to serve as fitting standards.

This meeting was concluded by the impressive Indian farewell given to Grace and Clarence Brubaker, as a fitting tribute of the love and good wishes of the Bow Valley congregation.

Rev. Fr. Arsenault Has Been Transferred

Rev. Fr. Arsenault has been transferred to the Fishburn District and last Sunday morning he preached his farewell sermon in Arrowwood. After the service the members of the congregation presented him with a purse of silver as a token of the esteem in which he was held. His successor will be Rev. Fr. McCormick of Waterton Lakes who will conduct his first service on Sunday Sept. 9.

LOST—Sunday, August 19, Springer Spaniel, black with gray on shoulders and hips, Carleton Place, Ontario. Send information to J. F. Watts, 835-17th Ave. West, Calgary, Phone W2423, or E. M. Collins, Garbutt Business College, Calgary. Reward.

A very serious accident occurred Wednesday at the farm of Mr. T. A. Kelly when Mr. Carl Troumer was terribly burned about the head, shoulders and arms when a gasoline engine exploded in front of him. He was rushed to town where he was treated by Dr. E. J. Liesemer.

Arrowwood Notes

School opens on Tuesday, Sept. 4th.

Mr. and Mrs. E. Lewendon, Raymond and Marjorie, spent the week-end at Banff.

The Aid will meet next Thursday afternoon, Sept. 6, in the Church Basement.

Mr. J. G. Brown, former pastor on the Milo-Queenstown field is spending a week in the community.

Lenora Troy, who had visited at the home of Mr. and Mrs. F. Johnson returned to her home in Mossleigh last Sunday.

Mr. and Mrs. D. J. Beagle visited at the home of Mrs. John Mackie at Carleton Place on Tuesday.

Mr. and Mrs. E. E. Jacques and children were visitors to Calgary on Sunday, returning Tuesday morning.

The United Jr. Sewing Circle will meet on Friday afternoon at Miss June Clifard's home at 2:30 o'clock.

Miss Rosemary Lord left on Monday for Glenview where she will remain for a couple of months.

Important Monday, Sept. 3: is a holiday the stores and elevators in Arrowwood will remain open all day owing to the busy season.

The Arrowwood Community Club will meet at the home of Mrs. Anderson on Tuesday, Sept. 4th at 2:30 o'clock. Roll Call; Household Hints.

Betty Rhea and Dorothy Jean Jones returned home Saturday from a two-weeks visit with their uncles at Olds and Calgary.

Mr. and Mrs. Henry Archambault, Mr. and Mrs. Eli Archambault and Mrs. Marshall of Ensign, were Sunday visitors at the home of Mr. and Mrs. E. D. Archambault.

The draw for the lucky ticket in the Community Club Doll Raffle will take place on Friday Aug. 31st at 5:30 pm in Clifard's store.

Mr. Sam Moss and Mr. F. Arney are visitors to Calgary to-day.

A number of high school students have been in Calgary writing Supplementary exams this week.

Grant Hall, senior vice-president of the Canadian Pacific Railway died in Montreal early Wednesday.

Mr. and Mrs. L. Phillips of Milo, visited Tuesday afternoon and evening with Mr. and Mrs. A. Phillips.

FOR SALE—A number of used High School Book (Grade XI), in good condition. For particulars, apply at Resource Office.

Mrs. T. A. Kelly and daughters Irene, Betty and Charlotte are moving to Calgary this week-end, where the girls will attend school.

R. H. Anderson wishes to announce that he has opened his Barber Shop and Pool Room and share of your patronage would be appreciated.

Mr. Malcolm Taylor returned last week from his vacation spent in Calgary, Banff and Vancouver. His aunt, Mrs. G. M. Taylor, of Vancouver, accompanied him, and is visiting with Mr. and Mrs. C. G. Taylor.

The Church of the Brethren Business meeting will be held next Sunday afternoon at 2:30. Instead of Tuesday as previously announced. This change is made because of the busy harvest season. Election of officers for the year and other important business.

Last week Mr. J. McCann was displaying a sample of wheat from their field on Mrs. D. McInenly's farm, which stood nearly four feet tall. The heads, measuring nearly four inches, were well filled with good plump grain.

Mr. Clarence Brubaker and his sister Miss Grace Brubaker left Monday morning for California. They intend to arrive at their destination before the end of the week. Mr. Brubaker is employed as a public school teacher in Ojai, Calif., Miss Grace, as a governess in a family at La Verne. As they have been quite active in church and community life during the summer they will be greatly missed.

Alberta Grain Growers

READ THIS MESSAGE!

It is of vital importance that a strong co-operative elevator system should flourish in Alberta. It is desirable that such an elevator system should be under the control of Alberta grain growers—men who are actually following the occupation of farming.

The Alberta Pool Elevator system is the only organization in Alberta that meets these requirements.

All country elevators of the Pool system are operated under public license and as such are in a position to handle the grain of any grower.

Alberta Pool Elevators are on a sound financial basis; are efficiently managed and can give unexcelled service to the grain growers of this province. Alberta Pool agents are carefully selected and have strict instructions to give fair treatment, including proper weights and correct grades, to all patrons.

Alberta Pool Elevators operate on the co-operative principle of "Each for all and all for each"—a principle which will tend to bring a measure of economic and social justice, peace and prosperity throughout the world.

This Changing World

Probably no period of recorded history can show such a succession of surprising and kaleidoscopic changes, political and economic, that through which we are passing. The vast complex of peoples and nations comprising the civilized world to-day is in a state of uniformly unstable equilibrium—an equilibrium disturbed from time to time by a variety of insurances both major and minor. So frequent are they, so unexpected their character, so far-reaching their effects, that few even of the great among the prophets dare risk portraying the face of things to come in the immediate future. They feel safer in making (and indeed they prefer to make) their predictions at long range, and to envision a world more remote in time than that which is likely to concern much the present much-abused generation.

The political and economic changes which occurred during the storm years of 1914-18, the revolutionary upheavals which wrecked dynasties and brought new state forms into being, probably were larger in scale. But they were not so numerous nor, for that matter, did they strike with ruder shock than those of more recent occurrence. The protracted strain of the war itself served to dull and deaden the sensibilities of the people directly subjected to it, and more inclined to shock, they were inclined to lump all the catastrophes into one—the War. They were inclined, too, to the belief that, once peace was restored, the world would quickly revert to the pre-war basis and settle again to the ordered routine which seemed so stable until the unexpected happened at Sarajevo.

The world, however, has refused to settle down, refused to revert to the former status. The well-ordered machine which made this seem the best of all possible worlds until the summer of 1914, has never regained its old momentum. The people hanker for peace and a chance to routine their existence. They wish to remodel the new world on something like the old lines. But peace is denied them—peace, security and comfort, the comfort which comes from an assured livelihood, the peace which they felt after a volcano about to erupt, and never agitated by uncertainties make the more susceptible to the recurrent shocks which evidence the turmoil beneath. Thus the crises of the depression appear more menacing than those which occurred during years which seemed to have been a calm.

Recent events in Austria and Germany are symptomatic of the times. The world looks on with anxiety while these two nations writhe in their efforts to evolve a state form which can bring harmony and happiness to their peoples. Equally anxious is the world at large, however, are the experiments being tried in the United States and in Great Britain to evolve a new economy which will give work to the workless and restore the prosperity both in the past, have enjoyed. Both experiments involve complete revolutions in the national economic life of those countries, but few would agree that either yet had found the solution within itself.

It is unnecessary to enumerate the many changes during the period of depression. Books on political and economic subjects become obsolete in a day. Anyone who reads knows that. Take, for example, the following quotation from a book which reached shelves of public libraries in Western Canada little more than a year ago:

"Nobody doubts, for instance, that America will overcome the present difficulties once it gets a grip on itself. France is sitting comfortably, and even Germany is held to have a fair chance. . . . But the issue is more doubtful for Great Britain because her malady seems more fundamental. Already, the British Empire has fallen from its former high estate."

The picture has been entirely reversed since then. Scarcely a statement in the quotation stands to-day—and that is but a sample of the dangers besetting the world as prophesied in this dynamic fluid world. Apparently the unstable condition will continue until every nostrum and every alleged cure-all has been tried and tried in vain. Then perchance, a world on the verge of ruin will realize that it is not so much the medicine that is wrong as the diagnosis. Indeed, were international unity replaced by international amity almost any kind of political or economic medicine might cure remaining ills.

Realises Its Value

Governor-General Is Patron To Junior Farm Clubs

Club members and everyone associated with club work for farm boys and girls will sincerely appreciate the great honor that has been accorded to the junior farm club movement by His Excellency the Governor-General, the Earl of Dufferin, who has extended his patronage to the Canadian Council on Boys' and Girls' Club Work.

The recognition that His Excellency has thus given to the value of junior club work in Canada should encourage greater activity on the part of every club member and stimulate a deeper sense of the opportunities that are provided in this form of agricultural extension.

Up To The Architect

Instead of saying that man is a creature of circumstance, it would be nearer the mark to say that man is the architect of circumstance. It is character which builds an existence out of circumstance. From the same material one man builds palaces, another hovels, one warehouses, another villas. Bricks and mortar are mortar and bricks until the architect can make them something else.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Foster's Extract of Wild Strawberry in such cases relieves the pain, checks the looseness of the bowels, and thus does away with the usual weakness and prostration which attend the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating action of the stomach and bowels, and by the weakened system, thus making it a remedy for the treatment of diarrhoea of both young and old.

On the market for 88 years—you do not experiment when you use it.

Put up only by The T. Millburn Co. Ltd., Toronto, Ont.

Seeking New Height Record

Wiley Post Will Use Flying Suit He Invented

With a specially constructed flying suit of his own invention, Wiley Post, world-circler, will soon take off in an attempt to better the present altitude record of 47,352 feet.

His well-known companion, the "Winnie Mae", a ship almost as famous as Lindbergh's "Spirit of St. Louis", has been remodeled with the addition of a new 420-horse-power motor and two superchargers so that his speed is expected to be increased to 300 miles per hour at ordinary altitudes, and seemingly impossible velocities in the stratosphere where air resistance approaches "nil".

Post's flight is not primarily for purposes of breaking records, but to test his airsuit in the body of the "Winnie Mae".

"Engineers have always said if we had a variable pitch propeller and a super-charged motor we could fly in any altitude if the body could function normally," Post explained. "Well, we have the propellers and the superchargers and I believe this suit will conquer the last obstacle."

The suit consists of rubberized fabric trousers covering the entire trunk of the body up to the shoulders and a rubber piece placed against an aluminum head gear. The wearer will get air through the supercharger, which also supplies the motor. The suit, of course, is airtight.

Post hopes to get enough information in his first flight to aid him in winning the \$50,000 London-to-Australia derby next October.

British Dominions

Emigration Society

Secretary Returns To England After A Visit To Canada

Concluding his forty-second visit to Canada from Britain, Robert Culver, secretary of the British Dominions Emigration Society, returns on the Cunard White Star Line steamer from Montreal.

"I am impressed," declared Mr. Culver in an interview, "with the improvement in Canadian business conditions over the last year. There are many signs of material progress and a feeling of returning confidence among influential people I have met here this year. I feel that before

Robert Culver and R. Gordon Burgoyne of the British Dominions Emigration Society, who returned to Britain on the White Star Line steamer.

long we shall have a greater opportunity of increasing the work of our society in the Dominion."

The British Dominions Emigration Society was founded in 1882 by the Rev. Mr. Culver. During these 52 years over 57,000 have been assisted to emigrate, and the feature of the work I am most proud of is that we have never charged one cent interest on the money advanced. It was not surprising therefore, though most gratifying to our society, to receive a commendatory letter from your Prime Minister, the Rt. Hon. R. B. Bennett, paying warm tribute to our work upon the occasion of our 50th anniversary. At the present time our work is almost entirely confined to the re-unions of British families."

The society enjoys the high prestige of H.R.H. Princess Louise, Duchess of Argyll, and a list of distinguished vice-presidents which includes The Most Noble the Marquis of Salisbury, K.G. G.C.V.O.; The

Rock Slide At Niagara

Huge Chunk Weighing Thirty Million Pounds Gave Over The Falls

A gigantic pile of rock estimated to weigh 30,000,000 pounds rose above the water in Niagara gorge recently, visible evidence of the second major rock slide from Horseshoe Falls since 1931.

Water was flowing over what was very much a splashier thronged in the shore of Goat Island in an effort to obtain a view of the jagged, saw-like rim of the falls and the huge pile made it. But mist obscured the view, showing the secret of Nature's wonder.

The huge chunk fell from the cataract with a deafening roar that seemed to still the sound of water pouring over the precipice. The rock landed in the gorge, sending a spout of water more than 200 feet into the air.

The lip of one of Canada's great wonders lifted as if from a charge of dynamite, heaved, groaned and slid away with a roar. Where there was only a drizzle of water a huge stream began to pour.

Niagara Falls, in its recent break, demonstrated a geological belief that this scenic wonder is only the last of the American Niagara, and like the others, is headed towards extinction in perhaps 20,000 years.

Brazil is chiefly an agricultural country and the diversity of climate facilitates the cultivation of practically every agricultural product. Nevertheless, Canada in the fiscal year 1933-34 exported \$237,511 worth of agricultural and vegetable products to Brazil, including wheat and showing an increase of \$202,108 on the preceding year.

Right Hon. and Right Rev. The Lord Bishop of London, The Right Rev. The Lord Bishop of St. Stephen, The Right Hon. Lord Lloyd, The Right Hon. Lord Middleton, Sir Archibald Weigall.

The society's Canadian manager is R. Gordon Burgoyne of Montreal; the local committee includes many business and professional leaders.

Committees of similar caliber co-operate with the society in Toronto, Halifax and Saint John, N.B. Assistance to emigrate takes the form of grants or loans made under varying conditions to suit circumstances, to British-born subjects of good character and sound health; also of advice and help to settlers after their arrival.

Makes "Color-Music"

Attachment From Piano Invented By English Engineer

I. Shamah, English, electrical engineer, has invented an apparatus for making "color-music" which may be used in any home as an attachment to a piano. By means of this, a revolving room may be made by diffusing lights which will automatically react in colors to whatever tune is played. He has so graded the vibrations of a piano in shades of yellow and silver. Another invention by Mr. Shamah enables one to "feel" music. You hold two metal tubes and when a tune is played you feel the rhythm of it like a beating pulse, which send a pleasant tingling sensation up the arms.

Telephone Of The Future

Eighty-Three Year-Old Scientist Working On Invention

Sir John Ambrose Fleming, a celebrated scientist who has had a good deal to do with the development of the vacuum tube, is the inventor of a thermionic valve—which made wireless telegraphy possible. "In a few years' time," he said the other day, "we shall probably chuckle over the recollection of what telephones were like in 1894. Everybody knows that the telephone is in its infancy; everybody knows that it can be improved enormously. What form will that improvement take? I am a scientist, not a prophet. The telephone may be a little box that you can carry in your pocket. It may become more elaborate than it is today. I do not choose to prophesy. I'm certainly not going to tell you on what lines I am working now to improve the telephone." Sir John Fleming is 83, and a very busy 83.

Making The Roads Safe

British Courts Do Not Handle Reckless Drivers Easily

British courts are ruthless with motorists who carelessly endanger the safety of others. Kaye took a sentence on this account, and another example is to be handed in the sentence of a girl, recommended to mercy by the jury and then getting off with half the term the judge had intended to impose, sent to jail for six months for manslaughter. She said she had been ill and took some gin to relieve the pain, and had had three bottles of beer as well as the gin. Her driver's license was revoked and she was disqualified for driving from driving. That is the way to make the roads safe—Hamilton Herald.

Made Fast Trip

A homing pigeon, owned by Arthur Miller of Saint Ste. Marie, made a hop of 561 miles from Minnesota to Saint Ste. Marie, in 25 hours. Released at Minneapolis one day at 9 a.m., the bird arrived at 10 a.m. the next day.

Bridge and bridge tournaments are regarded as gaming in England.

First Anniversary To Be Celebrated In Germany This Year

The fifth anniversary of the first motor-cycle is to be celebrated this year; a monument is to be erected to Gottlieb Daimler in Schorndorf, Germany. Working behind the shutters of a shop in Stuttgart, Daimler and Wilhelm Maybach made the first motor-cycle, and in the same year the first motor-boat was launched in the river Neckar, a tributary of the Rhine. Believing the inventors were manufacturing counterfeit money, the police raided their workshop, and as there was considerable public fear of petrol, wires mounted on porcelain insulators were placed around the premises to give the impression that the motive power was electricity. In the following year the first "horseless" carriage left the shop. It was an ordinary horse-drawn carriage with metal tires on which one cylinder of 1½ horsepower was mounted. It achieved a speed of eleven miles an hour.

A Pulpit On Wheels

See Minister Preaching From Mobile

In the Church of St. James, Clonely, is a pulpit on tram lines. The pulpit which existed before 1888, was very high and ugly, so it was decided to cut it down to its present proportions. When placed in a certain position in the church it concealed the altar, and when in the only other suitable position, people in the gallery could not see the preacher. Now before the sermon, the sexton pushes the pulpit on its lines to the centre of the church, and after the sermon it is pushed back again.

Gigantic Wine Cask

Heidelberg's famous cask will be a mere barrel compared to a wooden giant under construction at Bad Duerkheim, Germany, and destined to be the world's largest wine vat. Resting on foundations of concrete it will have a capacity of 350,000 gallons, against the mere 50,000 gallons of the Heidelberg barrel.

OFF COLOUR?
HOW IS YOUR LIVER?

Wake up your Liver Bile

—Without Calomel
Your liver's a very small organ, but it regulates the circulation of bile, and if it gets out of order, it causes all sorts of troubles. You can't get rid of it by refusing to eat your daily two pounds of solid food, but you can get it working again by taking a course of Dr. Williams' Pink Pills. They're pure, reliable, safe. Ask for signs by name. Beware of cheap imitations. See it at drugstore.

Has a hundred uses. Always have a box in the kitchen. Applaud PAPER PRODUCTS. HAMILTON, ONTARIO.

Editor and Publisher

The Arrowwood Bible School

"The greatest thing in the world is human life. The greatest work in the world is the helpful touch upon that life. Here and there an artist in soul culture is found at the task, but many are unskilled and the product of the labor is far from a rare 'perfect in Christ'."

"Specialist," "trained workmen," "skilled labor" are popular expressions in the realm of business and the common tasks of life. In the "greatest work in the world"—the vital task of training in religion and morals there are entirely too few trained workers.

The Arrowwood Bible School is being held for the purpose of acquainting workers in the field of religion with the greatest of all books—the Bible—and of preparing them for the great task of training childhood and youth in righteous living.

The school opens November 5th and will continue 16 weeks.—V.B.W.

From Wagon to Sea-Board—
—Fair and Efficient dealing in the A.P.' Standard of Service—

THE ALBERTA PACIFIC GRAIN COMPANY
INCORPORATED AND LICENSED WITH THE BOARD OF GRAIN COMMISSIONERS

Here and There

Reduced fares to cover the Labor Day week-end from Aug. 31 to 13 noon Monday, Aug. 3, have been authorized on the Canadian Pacific Railway between all stations in Canada. Round trip tickets will be at the rate of fare and a quarter and will be good until midnight, Tuesday, September 4.

Returning from White City, London, Eng., aboard Canadian Pacific liner Montreal, the athletes who represented Canada at the British Empire games came back practically in a body to the number of around 100. They sailed for England aboard the Duchess of York July 20.

Australis is showing very substantial evidence of recovery with continued betterment in sight. The view of John P. Murphy, Commonwealth Trade Representative at New York, stated when interviewed aboard S.S. Niagara on arrival recently at Victoria.

Fifty per cent ahead of last year at mid-August with prospects for balance of season exceptionally good for the Canadian Pacific hotels and resorts in the Rockies is reported by A. E. Robertson, assistant general manager, in charge of the Company's western hotels.

Prominent British parliamentarians are visiting the Maritime Provinces this year, including Prime Minister Dr. L. B. Macdonald. The Canadian Pacific liner Montreal recently carried as a passenger Dr. L. B. Macdonald, M.P., parliamentary secretary of the British Empire of Trade, who will stay at St. John's, N.S., and the St. John's and Digby, N.S.

Canadian Pacific flag ship Empress of Britain claimed a new record recently for the Quebec-Cherbourg Atlantic crossing, making the trip in four days, four hours and fifty-eight minutes, being thirty-four minutes under her own previous record set in August, 1932.

Montagu Norman, governor of the Bank of England, whose evasive tactics have given newspaper men some strenuous times in the few years, actually posed for a photograph aboard Canadian Pacific liner Duchess of Bedford on his return to England recently. "Wait till I get my hat on straight," was his comment to the astonished and gratified photographer.

Railway building is by no means at an end in Canada, S. W. Beatty, E.C. chairman and president of the Canadian Pacific Railway, stated recently following an extended inspection trip through Western Ontario. "Completion of our development will probably mean construction of more railway mileage to outlying districts as prospects and development warrant," he said.

Be Clean

At the time when John Wesley said "cleanliness is next to godliness" one of his audience remarked, in all truthfulness, "and sometimes that is impossible." The good old days may have been romantic and picturesque but on the whole, conditions were very dirty and foul-smelling and uncomfortable, because of vermin.

As the standards of living improve, so the standards of cleanliness are raised. One of the striking contrasts between the civilized and the uncivilized is the different attitude which exists regarding cleanliness of persons and in the handling of food.

A great deal of cleanliness has no direct bearing upon health; most of it is a matter of what we would call decency.

its practice grows out of a sense of comfort and self-respect associated with a clean body in clean clothes, and almost sure to be soiled with a dirty body is offensive to sight and smell.

Some forms of cleanliness have a very direct bearing upon health. Dirty hands are dangerous enemies. Dirty hands are almost sure to be soiled with body secretions which so often contain disease germs. These germs on the hands gain entrance into the body in putting fingers into mouth, by touching the lips or through handling food which is later eaten without having been cooked.

We do not know of any other way in which we can so definitely protect ourselves against disease germs through our own habits as by thoroughly washing the hands before eating or handling food. If the hands are to be kept really clean, the nails must be fairly short so that they may be cleaned regularly. Use soap and warm water freely and do not hesitate to apply the nail brush.

A clean skin is a healthier skin in that when freed from dirt, it is able to do its work better. There is less danger of skin infections and lice are not found among those who bathe regularly and change their underwear frequently. A warm bath at least once a week is advised, and often, if necessary, dependent upon the type of work and the weather, to keep the skin clean and free from odors.

Use clean handkerchiefs. When soiled, handkerchiefs are not only unsightly but the secretions they contain are picked up by the fingers, and it is these secretions which must always be regarded with suspicion. Most of the communicable diseases which occur in this country are spread by the germs that are found in secretions from the nose and mouth.

AUSTRALIAN WHEAT SITUATION

(Average Annual Wheat Production 180 Million Bushels)

Australia produces three important crops—Wheat, Mutton and Wool. Since the depression started much acreage formerly in grasses and native pasture devoted to the production of mutton and wool was turned to wheat-raising for the reason that the prices of mutton and wool fell relatively lower than the prices of wheat. Australia refused to withhold either mutton or wool from the market. She pressed these products for sale at any price. In consequence she has today no surplus of wool and so last year the price of wool has made a remarkable recovery. This will certainly tend to induce Australia to keep up her mutton and wool raising and to devote it once again to the more profitable business of sheep raising.

Curiosity Causes Tiny Tot to Leap from High Window

Mack William Lyle, Jr., two-year-old son of Mr. and Mrs. Mack Lyle, 1833, Eighteenth street southwest, miraculously escaped injury Friday when he jumped through an upstairs window of his home, 20 feet to the lawn below.

He was picked up by his parents and examined by Dr. A. I. McCalla, who found that the lad had suffered no injury what ever. Childish curiosity is believed to be responsible for the infant's jump.—Calgary Albertan.

RUSSIAN WHEAT SITUATION
(Annual Average Wheat Production 880 Million Bushels)

It is estimated that since 1916 the population in Russia has increased by at least 25 million persons, which means that Russia's annual requirements of wheat are at least 125 million bushels per annum more at this time than they were in 1916. Her production of wheat in 1916 is not accurately known, but it can be said with fair accuracy that the average annual production for the past two or three years has been very little, if any, greater than it was before the War in 1913 and 1914. Thus it will be seen that Russia easily requires all the wheat she is now producing for the use of her own people. Russia, therefore, should not be, on the average, a serious competitor in world wheat markets.

SEARLE GRAIN COMPANY LIMITED

Where does your merchant keep PERISHABLE Food?

YOU'RE probably a bit "fussy" in your home about the foods you serve, careful to guard them from disease-bearing Bacteria by correct refrigeration below 50 degrees from the moment they enter your home, because you know that unless perishable foods are protected from the heated atmosphere they quickly lose their freshness and may endanger health.

DOES your merchant safeguard the foods which you purchase by using Electric Refrigeration, or IS YOUR FOOD IN DANGER before it even reaches your home?

NEXT time you go shopping for food which you look around the store and see if you are getting this definite assurance of freshness. YOU'RE ENTITLED TO IT.
